SUBJECT: Preliminary Scope of Work

REFER: CEA 8777 Sauget Sites - Dead Creek

TO: Alan Faust
Jim Fritsch
Jo Hanson
Steve Smith

Attached is the 1/21/92 issue of the Preliminary Scope of Work for the potential work at Dead Creek. This document will be used to obtain a ballpark estimate of the cost to perform the sediment removal work at Dead Creek. We are working with three contractors, who will give us this information.

Very recently we considered doing only a portion of the sediment removal from site M. Test results just taken, however, show the PCB levels in all parts of the pond to be higher than the original tests showed. As a result, we now plan to remove the sediment from all portions of site M.

This document also reflects that we are now going to do the work in accordance with a Consent Decree. This impacts how we will now do the work, and is reflected in this document. Most notably, the removal work will now be scheduled for 1993.

Jim will write a cover letter and forward this document to the contractors for the quick cost estimate.

If you have any final comments on this document, let me know so I can make the final changes.

Gordon
